

1. Primary Model - The All-Rounder

What it is: Basic fraud detector (like a standard security guard)

Good at: Normal everyday fraud detection

Used when: Things are working normally

2. Precision Specialist - The False Alarm Preventer

What it is: Very careful fraud detector

Good at: Avoiding false alarms (won't block your card unnecessarily)

Used when: Too many legitimate transactions are being flagged

3. Recall Specialist - The Fraud Catcher

What it is: Aggressive fraud detector

Good at: Catching real fraud (even if some false alarms)

Used when: Real fraud is being missed

4. Complex Pattern Specialist - The Pattern Finder

What it is: Smart pattern recognition system

Good at: Spotting tricky, hidden fraud patterns

Used when: Fraud is using clever new tricks

5. Drift Recovery Specialist - The Adaptor

What it is: Flexible, learning system

Good at: Adapting to completely new situations

Used when: Everything has changed and nothing else works
